

Theresa M. Lavery

Department of Ecology and Evolution, University of Chicago
tlavery@uchicago.edu | +1-609-515-3953 | lavertylab.org

Research Interests

I seek to answer questions rooted in applied population and community ecology using a variety of different research approaches. The theories I test with my field studies apply to a broad range of taxa, but my research to date has mainly focused on mammals and occasionally birds and reptiles. Most recently, I have studied the ecological and social dimensions of bat conservation.

Appointments

- | | |
|-------------|---|
| 2021 – | Postdoctoral Scholar, University of Chicago, Chicago, Illinois.
Supervisor: Cara Brook |
| 2019 – 2021 | Postdoctoral Fellow, Colorado State University, Fort Collins, Colorado.
Supervisor: Kathryn Stoner |

Education

- | | |
|-------------|---|
| 2015 – 2019 | Ph.D. in Fish, Wildlife, and Conservation Biology, Colorado State University
Dissertation – <i>Bats, elephants, and their food: A conservation perspective on trophic interactions in the Namib Desert</i>
Advisor: Joel Berger |
| 2013 – 2015 | Ph.D. student in Wildlife Biology, University of Montana
(transferred to Colorado State University in fall 2015)
Advisor: Joel Berger |
| 2006 – 2010 | A.B. in Ecology and Evolutionary Biology, Princeton University
Senior thesis – <i>Niche overlap in the diets of three Amazonian caiman species</i>
Advisor: Andrew Dobson |

Peer-Reviewed Journal Articles

- | | |
|------|--|
| 2022 | Lavery, TM , & Stoner, KE. In search of bachelorettes: Observations of male <i>Leptonycteris yerbabuenae</i> with dorsal patches across its range. <i>Therya</i> 13(2): 163–170. DOI: 10.12933/therya-22-1146

Invited Book Chapters

- 2020 **Lavery, TM**. The Namib Desert and its bats. In: Goldstein, MI, & DellaSala, DA (eds.), *Encyclopedia of the world's biomes*, Vol. 2. Oxford: Elsevier, pp. 181–192. DOI: [10.1016/B978-0-12-409548-9.12011-1](https://doi.org/10.1016/B978-0-12-409548-9.12011-1)

Manuscripts Under Review

- Under review Wilkins, K, Carroll, SL, Davis, KP, Hauptfeld, R, Jones, MS, Larson, CL, **Lavery, TM**, & Pejchar, L. Sexual harassment disproportionately affects historically excluded graduate students.

Awards & Grants

- 2022 Outstanding publication award, Department of Fish, Wildlife, and Conservation Biology, Colorado State University, for the paper: Aubry, LM, Lavery, TM, & Zhao, M. 2021. Impacts of COVID-19 on ecology and evolutionary biology faculty in the United States. *Ecological Applications* 31(2): e02265.
- 2021 – 2023 Team member, “Coding for conservation: Quantitative training for the next generation of environmental leaders in Madagascar,” Meridian Project Grant, National Geographic Society (\$25,000; Cara Brook, PI).
- 2020 – 2022 Co-PI, “Seasonal abundance, population structure, and diet of long-nosed bats in southwestern New Mexico in relation to contemporaneous food availability,” New Mexico Department of Game and Fish Share With Wildlife (\$49,839.17; Kathryn Stoner, PI).
- 2013 – 2018 National Science Foundation Graduate Research Fellowship Program (\$132,000).
- 2017 Eugene Decker Fellowship, Colorado State University (\$5,000).
Hill Memorial Fellowship, Colorado State University (\$4,750).
Student Research Scholarship for Global Bat Conservation Priorities, Bat Conservation International (\$3,000).
- 2016 WCNR Student Success Scholarship, Colorado State University (\$1,300).
Grant-In-Aid of Research, Sigma Xi (\$1,000).
- 2015 Exploration Fund, The Explorers Club (\$1,400).
Fulbright U.S. Student Program for Namibia, Alternate.

	George and Mildred Cirica Graduate Student Support Fund, University of Montana (\$5,000; declined due to university transfer).
2014	Young Explorers Grant, National Geographic Society (\$5,000). Danny On Memorial Scholarship, University of Montana (\$500). Fred H. Mass Scholarship, University of Montana (\$500).
2010	Departmental Honors, Ecology and Evolutionary Biology, Princeton University. Ecology and Evolutionary Biology Senior Poster Prize for Best Field Poster, Princeton University.
2009	John T. Bonner Senior Thesis Fund and the Dean of the College Fund for undergraduate senior thesis research, Princeton University (\$7,800).

Invited Presentations

Planned	Lavery, TM. The ecology and conservation of bats (big and small). Program in Ecology, Evolution, and Conservation Biology seminar, University of Illinois at Urbana-Champaign, virtual.
2022	Lavery, TM, Teel, TL, Gawusab, AA, & Berger, J. Bad omens or "just like chickens": Perceptions of bats among a Namibian pastoralist community. 2022 Joint Meeting of the 19 th International Bat Research Conference and 50 th North American Society for Bat Research, Austin, TX, USA. (Invited to speak in organized session) Lavery, TM. Population and community ecology in desert landscapes: insights from bat biodiversity. Fish, Wildlife, and Conservation Ecology departmental seminar, New Mexico State University, Las Cruces, NM, USA.
2021	Lavery, TM. The ecology and conservation of desert-dwelling bats. Brown Bat Lunch seminar, Bat Conservation International, virtual. Lavery, TM. Conservation ecology of desert bats. Graduate Program in Ecology and Evolution Seminar series, Rutgers University- New Brunswick, virtual. Lavery, TM. Indirect effects of African megaherbivore conservation on bat diversity in the world's oldest desert. Emerging Issues in Conservation Seminar series, Society for Conservation Biology, virtual. https://vimeo.com/596141875 Lavery, TM. Food, water, and appreciation: the ecology and conservation of desert bats. Biology departmental seminar, Indiana State University, virtual. Lavery, TM. Hidden biodiversity in our deserts: Social and ecological drivers of bat assemblages. Biology Seminar series, University of Northern Colorado, virtual.
2020	Bombaci, SP, & Lavery, TM. Research advancing justice, equity, and inclusion in Ecology and STEM. Biological Sciences departmental seminar, Boise State University, virtual.

Lavery, TM. Unraveling desert communities: Using acoustics to study the drivers of bat biodiversity. Aquatic Ecology Group, Oak Ridge National Laboratory, virtual.

Contributed Presentations at Meetings & Conferences (* denotes presenter)

Planned	Davies, ML*, Lavery, TM , Wells, CP, & Stoner, KE. Plasticity of the lesser long-nosed bat diet at the northern extent of its range. The Wildlife Society's 29 th Annual Conference, Spokane, WA, USA.
2022	<p>Wilkins, K*, Carroll, SL, Davis, KP, Hauptfeld, R, Jones, MS, Larson, CL, Lavery, TM, & Pejchar, L. Sexual harassment disproportionately affects historically excluded graduate students in ecology and evolutionary biology. 2022 Joint Meeting of the Ecological Society of America and the Canadian Society for Ecology and Evolution, Montréal, Québec, Canada.</p> <p>Davies, ML*, Lavery, TM, Wells, CP, & Stoner, KE. Plasticity of the lesser long-nosed bat diet at the northern extent of its range. 2022 Joint Meeting of the 19th International Bat Research Conference and 50th North American Society for Bat Research, Austin, TX, USA.</p> <p>Cornelius Ruhs, E*, Sterling, SL, Ranaivoson, HC, Tso, M, Kettenburg, G, Andrianiana, A, Andry, S, Ravelomanantsoa, NAF, Lavery, TM, Héraud, JM, Laing, ED, & Brook, CE. Seasonal patterns in the serology and reproductive cycle of Madagascar fruit bats. 3rd International Symposium on Infectious Diseases of Bats, Fort Collins, CO, USA.</p> <p>Wilkins, K, Carroll, SL, Davis, KP, Hauptfeld, R, Jones, MS*, Larson, CL, Lavery, TM, & Pejchar, L. Sexual harassment disproportionately affects historically excluded graduate students. 6th North American Congress for Conservation Biology, Reno, NV, USA.</p> <p>Wilkins, K, Carroll, SL, Davis, KP, Hauptfeld, R, Jones, MS, Larson, CL, Lavery, TM, & Pejchar, L*. Sexual harassment disproportionately affects historically excluded graduate students. Joint Meeting of the 140th American Ornithological Society and 24th BirdsCaribbean, San Juan, Puerto Rico.</p>
2021	<p>Lavery, TM*, & Berger, J. Conservation of megaherbivores modulates bat diversity in the world's oldest desert. 30th International Congress for Conservation Biology, virtual.</p> <p>Lavery, TM*, & Stoner, KE. In search of bachelorettes: Dorsal patches in male <i>Leptonycteris yerbabuenae</i> in the southwestern United States. Western Bat Working Group meeting, virtual.</p>
2020	<p>Davies, ML*, & Lavery, TM*. Updates on <i>Leptonycteris</i> activity and nectar availability in southern New Mexico. New Mexico Bat Working Group meeting, virtual.</p> <p>Lavery, TM*, & Berger, J. Does conserving desert elephants conserve bats? 5th North American Congress for Conservation Biology, virtual.</p>
2019	Lavery, TM* . Updates on <i>Leptonycteris</i> in southern New Mexico. New Mexico Bat Working Group meeting, Sevilleta National Wildlife Refuge, NM, USA.

- Laverty, TM***, & Berger, J. Are bats seeking out clean water? A perspective from the Namib Desert. North American Society for Bat Research 49th Annual Symposium, Kalamazoo, MI, USA.

- 2017 Mushabati, LM*, Eiseb, SJ, Benda, P, & **Laverty, TM**. Changes in bat activity over an altitudinal gradient in the Kunene region, Namibia. 2017 Combined Congress of the Entomological and Zoological Societies of Southern Africa, Pretoria, South Africa.
- 2010 **Laverty, TM***. Niche overlap in the diets of three sympatric caiman species. Cannon Memorial Senior Poster Presentation and Princeton Undergraduate Research Symposium, Princeton, NJ, USA.

Relevant Research Experience

- Sept 2021 – Postdoctoral Scholar, University of Chicago. Madagascar. Supervisor: Cara Brook.
- Conducting fieldwork in Madagascar to understand how pathogen loads vary in frugivorous bat communities—the Madagascar flying fox, the Madagascar fruit bat, and the Madagascar rousette—in relation to reproductive (e.g., pregnancy status) and seasonal factors (e.g., food). Also designing a population model for Old World fruit bats and using epigenetic sequencing to age individual Malagasy bats from wing punches. Future work will include conducting molecular dietary analysis from collected fecal samples.
- May 2019 – Postdoctoral Fellow, Colorado State University. Hidalgo, Grant, and Luna Counties, New Mexico. Supervisor: Kathryn Stoner.
- Studied pollinators (lesser and Mexican long-nosed bats) in southwestern New Mexico as a postdoctoral fellow at Colorado State University, in which I tested whether seasonal and nightly activity in the area is matched or mismatched with food (nectar of *Agave* spp.) availability and estimated local bat population sizes. This work was funded by the US Department of Interior Bureau of Land Management, New Mexico Department of Game and Fish, and Bat Conservation International.
- Aug 2013 – PhD Student, University of Montana (2013 – 2015) and Colorado State University (2015 – 2019). Kunene Region, Namibia. Advisor: Joel Berger.
- Conducted my dissertation research on factors structuring Namibian bat communities, including large herbivore distributions (i.e., elephants, black rhinoceroses, giraffes) and water quality and availability. Also interviewed local pastoralists to assess wildlife value orientations, attitudes toward wildlife, and cultural stories about bats in addition to quantifying human-wildlife conflicts and identifying areas for conservation opportunities. Fieldwork totaled ~18 months and was funded by the National Science Foundation, National Geographic Society, Bat Conservation International, The Explorers Club, Sigma Xi, Colorado State University, and the University of Montana. Collaborators included Seth Eiseb and Lina Mushabati (University of Namibia).
- Apr 2013 – Research Assistant, Conserve Wildlife Foundation of New Jersey. Cape May County, New Jersey. Supervisor: Todd Pover.
- Monitored threatened and endangered beach nesting birds for a summer along the New Jersey coastline and educated beachgoers on the importance of excluding human activities from the nesting area. This work was funded by the Conserve Wildlife Foundation of New Jersey in collaboration with New Jersey Division of Fish and Wildlife.
- Mar 2012 – Research Assistant, Max Planck Institute for Evolutionary Anthropology. Bwindi Impenetrable National Park, Uganda. Supervisor: Martha Robbins.
- Managed a long-term behavioral study on endangered mountain gorillas and a team of ~10 Ugandan field assistants for just over one year. Also oversaw conservation clubs at eight local primary schools.

- Sept 2011 – Feb 2012 Research Assistant, Princeton University. Mpala Research Centre, Kenya. Supervisors: Daniel Rubenstein & Corinna Riginos.
- Assessed spatial and temporal relationships between wildlife and humans/livestock and assisted with a savanna restoration project to determine the effectiveness of different types of erosion barriers and the wildlife response to each treatment. Also oversaw the fieldwork component of a Princeton University African landscapes course of ~10 undergraduates.
- Jun 2011 – Aug 2011 Research Assistant, University of Wyoming. Yellowstone National Park, USA. Supervisor: Matthew Talluto.
- Collected data as a summer field technician on a graduate project relating serotiny of lodgepole pines to red squirrel distributions and seed predation over time.
- Jun 2010 – Jun 2011 Princeton in Africa Fellow. Mpala Research Centre, Kenya. Supervisors: Margaret Kinnaird and Timothy O'Brien.
- Studied the effects of land management practices on wildlife communities with camera traps and monitored individual elephants. Also oversaw afterschool conservation clubs at five local primary schools.
- Jan 2010 – Mar 2010 Semester Abroad Participant, Princeton University. Kenya. Instructors: Paula Kahumbu (WildlifeDirect), and Corinna Riginos and Daniel Rubenstein (Princeton University).
- Designed and carried out group research projects on the topics of rangeland ecology, behavioral ecology of two zebra species (and hybrids), and local pastoralist support of a migration corridor as part of a semester in the field instructed by professors from Princeton University and a Kenya non-governmental organization WildlifeDirect.
- Jun 2009 – Apr 2010 Undergraduate Student, Princeton University. Peruvian Amazon. Advisor: Andrew Dobson.
- Conducted my undergraduate senior thesis research over a summer on the dietary overlap of three Amazonian caiman species, including the protected black caiman. Participated in crocodilian population surveys with the assistance of ~4 Peruvians and international volunteers. This work was funded by Princeton University and field supervision was led by Richard Bodmer (University of Kent) and Operation Wallacea.
- Jan 2009 – Apr 2009 Semester Abroad Participant, Princeton University. Panama. Instructors: Martin Wikelski (Max Planck Institute for Ornithology), Stephen Pacala (Princeton University), and Yves Basset and Richard Cooke (Smithsonian Tropical Research Institute).
- Designed and carried out individual and group research projects on butterflies, damselfish, and capuchin monkeys as part of a semester in the field instructed by professors from Princeton University and research scientists at the Smithsonian Tropical Research Institute.

Teaching & Mentoring Experience

Teaching Assistantships

- 2018 – 2019 Teaching Assistant, NR 300: Biological Diversity, Colorado State University. ~190 students (2018) and ~200 students (2019). Instructor: Liba Pejchar.
- 2018 Teaching Assistant, FW 370: Design of Fish and Wildlife Projects, Colorado State University. ~60 students. Instructor: Lise Aubry.
- 2014 Teaching Assistant, WILD 480: The Upshot: Applied Wildlife Management, University of Montana. ~70 students. Instructor: Paul Krausman.
- 2013 Teaching Assistant, BIOO 101N: Montana Wildlife, University of Montana. ~60 students. Instructor: Joel Berger.
- 2012 Teaching Assistant, EEB 380: Ecology and Conservation of African Landscapes, Princeton University field course held at Mpala Research Centre, Kenya. ~10 students. Instructor: Corinna Riginos.

Guest Lectures

- 2018 – 2020 NR 300: Biological Diversity, Colorado State University.
- 2020 BZ 330: Mammalogy, Colorado State University.
- 2020 FW 455: Principles of Conservation Biology, Colorado State University.
- 2018 FW 370: Design of Fish and Wildlife Projects, Colorado State University.
- 2017 FW 104: Wildlife Ecology and Conservation, Colorado State University.
- 2014 – 2015 WILD 480: The Upshot: Applied Wildlife Management, University of Montana.

Mentorship

- 2022 – Angelo Andrianiana (PhD student, University of Antananarivo): I am assisting Angelo with the analysis and manuscript writing of an extensive study on the ectoparasite communities of two of Madagascar's frugivorous bats—the Madagascar fruit bat and the Madagascar rousette.
- 2020 – Mallory L. Davies (PhD student, Colorado State University): I am continuing to mentor Mallory on her question development and analysis. I trained and oversaw the fieldwork done by Mallory during parts of her first three field seasons (2020-2022) as a graduate student in the Stoner Lab. Mallory is relating weekly long-nosed bat population sizes with plant food availability in southwestern New Mexico. I also help guide her applications for additional funding. Previously, Mallory assisted with my PhD data collection in Namibia for five months after completing her undergraduate degree at the University of Montana. During that time, I supervised Mallory as she conducted the fieldwork for a project comparing the ectoparasite loads of different bat species. Mallory also contributed to several associated manuscripts written with other entomologists that are currently published.
- 2016 – 2017
- 2019 – 2021 Jeanie Coffield (undergraduate, Colorado State University): I served as Jeanie's undergraduate honors thesis advisor. Using thermal videos, Jeanie and I (with the assistance of two other Colorado State University undergraduates) estimated the population size of long-nosed bats at an important day roost in southwestern New Mexico.

- 2018 – 2019 Elena M. Gratton (undergraduate, Colorado State University): Elena completed the laboratory portion of a bat ectoparasite study for independent study credit toward a minor in entomology. Like Mallory, Elena contributed to several associated manuscripts written with other entomologists that are currently published.
- 2016 Lina M. Mushabati (MSc student, University of Namibia): I had approached Dr. Seth Eiseb to recruit a Namibian student to join me in the field. This led to nine months of overlap between Lina and I conducting our graduate research together in northwestern Namibia. I oversaw Lina's fieldwork on the influence of elevation and temperature on echolocation behaviors of bats and am a coauthor on the associated manuscript.

Service & Outreach

Committees & Panels

- 2021 – Member of the Diversity, Equity, and Inclusion Committee, Department of Ecology and Evolution, University of Chicago.
- 2020 – Member of the North American Bat Monitoring Program (NABat) Emergence/Summer Colony Count Working Group.
- 2017 – 2019 Planning committee member for the Northern Colorado & Wyoming chapter of Expanding Your Horizons—an annual STEM workshop for 6th through 8th grade girls.
- 2017 – 2018 Member of the Dr. David Otis Speaker Series Selection Committee, Colorado State University.
- 2017 Panel member for a National Science Foundation Graduate Research Fellowship Program Information Session, Colorado State University.
- 2013 – 2014 Graduate representative for the Population Ecology Search Committee, University of Montana.
- 2014 Graduate representative for the Department of Ecosystem & Conservation Sciences Student Evaluation Committee, University of Montana.

- Lavery, TM, & Curtis, A.** Desert bats: Untangling the Namib's secrets. Namibian Environment and Wildlife Society, Windhoek, Namibia.

Public Television Features

- 2018 Could Bats Guide Humans To Water?: CSU Researcher Finds Out. *Conversation Starter, Rocky Mountain Public Broadcasting Station (PBS)*. https://www.youtube.com/watch?v=wg_Weynsgf0

Peer Review

- Grants: Bat Conservation International; National Geographic Society
- Journals: *Acta Chiropterologica; Biological Conservation; Global Ecology and Biogeography; Herpetological Monographs; Human Dimensions of Wildlife; Mammal Review; Scientific Reports; Urban Ecosystems*

Professional Development

- 2022 Video Techniques for Tracking and Counting Bats, International Bat Research Conference, Austin, TX, USA. Instructors: Aaron Corcoran & Edward Hurme.

	Old World Bat Red List Assessment Workshop, International Bat Research Conference, Austin, TX, USA. Instructors: Dave Waldien, Justin Welbergen, & Paul Webala.
	A Crash Course in Managing Conservation Projects. North American Congress for Conservation Biology, virtual meeting. Instructor: Adam Barlow.
2020	Conservation Policy Crash-Course for Scientists, North American Congress for Conservation Biology, virtual meeting. Instructors: Michael Evans, Andrew Carter, & Jacob Malcom.
2019	Fundamentals of Structural Equation Modeling Course, Colorado State University's Graduate Degree Program in Ecology, Fort Collins, CO, USA. Instructor: James Grace.
2018	Introduction to Qualitative Data Collection and Analysis Workshop, North American Congress for Conservation Biology, Toronto, Canada. Instructors: Rebecca Thomas & Jessica Sparks.
	Translational Ecology Course, Southwest Climate Science Center, Tucson, AZ, USA. Instructors: Gregg Garfin, Steve Jackson, & Carolyn Enquist.
2017	Freshwater Health Index Applications and Implementation Workshop, International Congress for Conservation Biology, Cartagena, Colombia. Instructors: Helen Regan & Derek Vollmer.
2015	Communicating Science Workshop, University of Montana, Missoula, MT, USA. Instructor: Randy Olsen.
2014	Intro to GIS Course, Montana Chapter of the Society for Conservation Biology, Missoula, MT, USA. Instructor: Tara Chesley-Preston.
	Bayesian Population Analysis Course Using WinBUGS and JAGS, University of Montana, Missoula, MT, USA. Instructors: Marc Kéry & Michael Schaub.

Additional Skills & Certifications

Software:	Proficient in Microsoft Office (Word, Excel, PowerPoint, Access), R, GitHub, ArcGIS Pro, MARK, Kaleidoscope Pro, Sonobat.
Field Skills:	Worked and camped extensively in remote locations and over demanding terrains. Proficient in 4WD, manual transmission, off-road driving. Able to navigate with a compass and/or GPS unit. Skilled with the use of acoustic detectors, camera traps, thermal cameras, and behavioral study methods (focal and scan sampling). Led extensive capture and handling field campaigns for bats—mist nets, harp traps, acoustic monitoring, bleeding, swabbing for disease, and PIT tagging. Participated in small and large mammal captures (bats, rodents, impala, cheetah, lion). Designed and

carried out social science research (semi-structured interviews, online surveys) and plant phenology surveys.

Languages: Advanced understanding of Spanish. Working knowledge of Afrikaans, Malagasy, Rukiga, and Swahili.

Certifications: Wilderness First Aid (2015, 2007). PADI Open Water SCUBA Diver (2010).
